

## SEPTEMBER 2010 HALF-PRICE SPECIALS

York is offering the following four products as half-price specials for September; **Satin Finish**, **Tilewise**, **Rust Protectant** and **Exclusive Fragrance**. The last two products, **Rust Protectant** and **Exclusive Fragrance** were added to our price list in July and appear under Group "C" as specialty items.

**Satin Finish** has been used as a free sample at trade shows, CEC's etc as there is no similar product available as a consumer item in North America. **Satin Finish** is normally used on wooden furniture to restore its original luster. If you apply **Satin Finish** to a highly finished wood surface, you will be able to see your reflection in it after it has been polished. **Satin Finish** is extremely versatile and may also be used to restore leather, vinyl, norgahyde etc. The more you polish any surface after **Satin Finish** has been applied, the more it will shine.

**Tilewise** is the only product that we are aware of that will clean and restore ceramic tile and grouting at the same time. Prior to **Tilewise** being available, restoration technicians often discarded back splash boards and other tiled items after a fire.

**Rust Protectant** is one of four new products manufactured by York for use with Ultra Sonic equipment.

**Exclusive Fragrance** is one of four new products manufactured by York for use with Esporta equipment.

During September **Satin Finish** is available in cases of (4 x 4) 1 gal jugs for \$119.50 and 5 gal pails for \$134.50

**Tilewise** may be purchased in cases of (4 x 4) 1 gal jugs for \$114.50 and in 5 gal pails for \$137.50

**Rust Protectant** may be acquired for half-price for \$52.50 in a 5 gal pail when purchased with one of the other four products for use with ultra sonic equipment at full price.

**Exclusive Fragrance** may be acquired at half-price for \$109.50 in a 5 gal pail when purchased with one of the other four products for use in Esporta equipment at full price.
