

## AUGUST 2010 HALF-PRICE SPECIALS

During August, York will feature the following four products at half-price: **Odorwise**, **Supersolve**, **Burn Out**, and **Porcelainwise**.

Without understanding how biological products such as **Odorwise** work, you cannot deal with all the unpleasant odors you will encounter. **Odorwise** and its sister product **Naturalsolve** (same as **Odorwise** without a fragrance) are the ultimate solution for dealing with odors. **Odorwise** and **Naturalsolve** contain over 500 billion spores per gallon along with the greatest variety of enzymes making it the number one biological product in North America.

**Supersolve** is a heavy-duty cleaning solvent and is normally used as the first step in removing yellow oxides caused by heat on appliances. In some cases, **Supersolve** by itself will remove the yellow oxides but usually it is followed with an application of **Burn Out**. **Supersolve** is the number one product used for removing yellow oxides from plastic such as the trim around the monitor on a T.V. **Supersolve** is the only product capable of removing the frosting (chalking) found on wooden furniture after it has been submerged in water.

**Burn Out** as previously mentioned is used as the second step in removing yellow oxides from appliances. It is also effective in removing stains from: bathtubs, toilets, urinals, bidets, stainless steel sinks, vanity counters, taps, showers surrounds, computer cases, printers and monitors.

**Porcelainwise** is a mildly acidic solution used for cleaning porcelain. It is also the best product for cleaning bathtubs where the finish has been removed. It can also be used on stainless steel sinks, enamel, metal ovens, ceramics, aluminum, fiberglass, pots and pans and the build-up of calcium on faucets. For anyone living in the country that uses well water, it is the best product available for removing the brown spots in toilet bowels caused by the mineralization in the water.

**Odorwise** and **Naturalsolve** come in cases of (4 x 4) 1 gal jugs and will be available for \$148.50 per case and in 5 gal pails for \$169.50.

**Supersolve** during August in cases of (4 x 4) 1 gal jugs will be \$179.50 per case and in 5 gal pails \$204.50

**Burn Out** is available in cases of 12 quarts for \$99.50

**Porcelainwise** is packaged in cases 12- 1 liter bottles and can be purchased for \$92.50 per case
