

## NOVEMBER 2011 HALF-PRICE SPECIALS

York Chemical Technologies Inc is offering at half price for the month of November the following four products: **Alumaclean**, **Baby Powder Aerosol**, **Satin Finish**, and all five of our products formulated for use in ultrasonic equipment; **Smoke Remover (42)**, **Descaler and Oxide Remover (80)**, **Rust Protectant (300)**, **Deodorizer**, and **Electronic Cleaner (40)**

**Alumaclean** is a water based product that micro-etchs any aluminum surface. Micro-etching is the removal of a thin layer from the surface of aluminum without affecting its structural integrity. This is an extremely handy product when you are faced with a number of aluminum surfaces to clean.

**Baby Powder Aerosol** is a dry odor counteractant that can be used when you cannot use wet odor counteractants. As the name implies, it has a baby powder fragrance.

**Satin Finish** is a one of kind product that because of its uniqueness, several of **York's** customers have used it as free samples at trade shows. When used on wooden surfaces, it will enhance the grain in the finish. When you polish this product on high quality finished furniture, you will be able to see your own reflection. **Satin Finish** is equally good at restoring the finish on leather, vinyl, noga Hyde etc.

During November **Alumaclean** is available in cases of (4 x 4) 1 gal US and 4 litre Can jugs for \$124.50 per case and in 5 gal US or 20 litre Can pails.

Similarly, **Baby Powder Aerosol** is available in cases of 12 for \$114.50 per case.

**Sati Finish** can be purchased in cases of (4 x 4) 1 gal US and 4 litre Can jugs for \$124.50 per case and in 5 gal US and 20 litres Can pails for \$144.50.

Please check the Price List and Order Form under Section "C" on our web site [www.yorkchemtgech.com](http://www.yorkchemtgech.com) to obtain the original prices of all ultrasonic products. In addition to the 5 gal US and 20 litres Can pail you can also obtain pricing in 55 US gal drums and 45 imperial gal drums.
